

Global Manufacturing – on a Local Basis.

- United Kingdom -

Located in Wellingborough, Northamptonshire, our UK facility is ideally located for manufacturing and distribution across the country with close links to major road networks.

The site covers over 5,000 sq.m footprint, including office space, manufacturing floor space, engineering laboratory and test area. For distribution we have both indoor/outdoor storage areas.

Manufacturing focuses on wireless communication equipment, predominantly for network operators and private networks – such as antennas for infrastructure, small cell and DAS.

Localised cable and cable assemblies are distributed from this facility – RF jumpers and feeders, broadband cable, Optical Cables and Assemblies, Optical Premise equipment.

Our UK site offers the entire product portfolio of Amphenol – for our local markets in and around the UK.
