| Communications Port                  |   |   |   |
| stalling your new bardware, click Ne | avt   |   |   |
| Anning your new naronare, circle re  |   |   |   |
|                                      |   |   |   |
|                                      |   |   |   |
|                                      | to install:<br>Communications Port<br>stalling your new hardware, click N | to install:<br>Communications Port<br>stalling your new hardware, click Next. | to install:<br>Communications Port<br>stalling your new hardware, click Next. |

### Once the Installation is Complete, you will see this screen. Click 'Finish'

| Add Hardware | _  |
|--------------|--|
|              | Completing the Add Hardware Wizard   |
|              | The following hardware was installed:<br>Communications Port   |
|              | The software for this device is now installed, but may not work correctly.   |
|              | Windows cannot determine the settings for this device. Consult<br>the documentation that came with this device and use the<br>Resource tab to set the configuration. (Code 34) |
|              | View or change resources for this hardware (Advanced)  |
|              | To close this wizard, click Finish.  |
|              | < Back Finish Cancel   |

Now you will see 'Ports (COM & LPT) in the Device Manager List (see below)

Note: When PCU4-KIT-US is Plugged into the Computer, you will see 'Silicon Labs CP210x USB to UART Bridge (COMx). See Below.
