XXXpol | 65° Az | 16.4 / 17.7 / 18.3 dBi | 0-10° / 0-10° / 0-10° | 1914 x 305 x 162 mm | with Top Connectors

- Tri band antenna, dual polarisation, 6 connectors
- Independent tilt on each band 0-10° / 0-10° / 0-10°
- · UltraLine platform with multi-array capability
- MET and RET versions, AISG1.1 or 3GPP/AISG2.0
- Single RET module to control all tilt angles, fully inserted inside the antenna (field replaceable)

## 3rd Order for 2x20W Carriers **Electrical Downtilt Control**

Electrical downtilt for each band can be controlled separately. Tilt indicator(s) are covered by removable transparent cap(s).

| Electrical downtill for each balla c    | and be controlled separately. The indicator(s) are covered by removable transparent cap(s).  |  |  |  |
|---|--|--|--|--|
| Manual Electrical Tilt (MET)<br>Control | A coloured knob at the end of the tilt indicator allows change of the tilt without need of a tool. The knob colour is identical to the corresponding connector ring colour. To access the knob, remove the cap by turning it counterclockwise. It is re-installed by opposite rotation. Do not remove the transparent cap(s) from the antenna.   |  |  |  |
| Remote Electrical Tilt (RET)<br>Control | The remote control of the electrical tilt is managed by a Multi-Device Control Unit (MDCU) inserted in the bottom of the antenna. A single actuator individually controls the tilt of each band (no need for daisy chain cables between the bands). This module does not add any additional length to the antenna. For RET control, the transparent caps must be in place and locked. The tilt angle indicators always remain visible and the antenna still has manual tilt control (manual override). |  |  |  |
| RET Module Part Number                  | MDCU-A0000 for AISG1.1 protocol (one unit included in 6878300A-T)  |  |  |  |

1695-2690 MHz

In order to operate RET control, the transparent caps covering the tilt adjustment indicators must be engaged and locked. Do not cut them from the antenna.

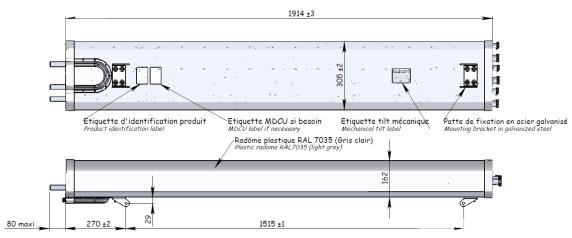

Always attach the antenna by the two mounting points.

Do no install the antenna with the connectors facing downward.

### Dimensions (in mm)

Tilt indicators covered by transparent caps.

Manual adjustment is accessed by removing the caps. Knob colours are the same as the connectors.
