

CX045X13x00

Single Band | Panel Antenna | X-Pol | 45° | 15.1 dBi | Variable Tilt

- Single band, X-Pol, variable tilt, panel antenna
- Patented internal RET actuator adds no additional length to the antenna

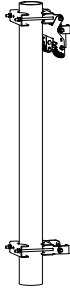

| Ordering Options | | Model Number | |

| Electrical Downtilt Control | | | | |
|--|--|--|----------------------|--------------|
| Electrical downtilt for each band can be controlled separately. Tilt indicator(s) are covered by removable transparent cap(s). | | | | |
| Manual Electrical Tilt (MET) Control | A colored knob at the end of the tilt indicator allows change of the tilt without need of a tool. The knob color is identical to the corresponding connector ring color. To access the knob, remove the cap by turning it counter-clockwise. It is re-installed by opposite rotation. Do not remove the transparent cap(s) from the antenna. | | | |
| Remote Electrical Tilt (RET) Control | The remote control of the electrical tilt is managed by a Multi-Device Control Unit (MDCU) inserted in the bottom of the antenna. A single module individually controls the tilt of each band (no need for daisy chain cables between the bands). This module does not add any additional length to the antenna. For RET control, the transparent caps must be in place and locked. The tilt angle indicators always remain visible and the antenna still has manual tilt control (manual override). Do not remove the transparent cap(s) from the antenna. | | | |
| Important Installation Instructions | <div>  <p>In order to operate RET control, the transparent caps covering the tilt adjustment indicators must be engaged and locked. Do not cut them from the antenna.</p> <p>Do not install the antenna with the connectors facing upward.</p> </div> | | | |

Location of the MDCU for RET Control

Tilt indicator covered by transparent cap.
Manual adjustment is accessed by removing the cap.
Knob color is the same as the connectors.

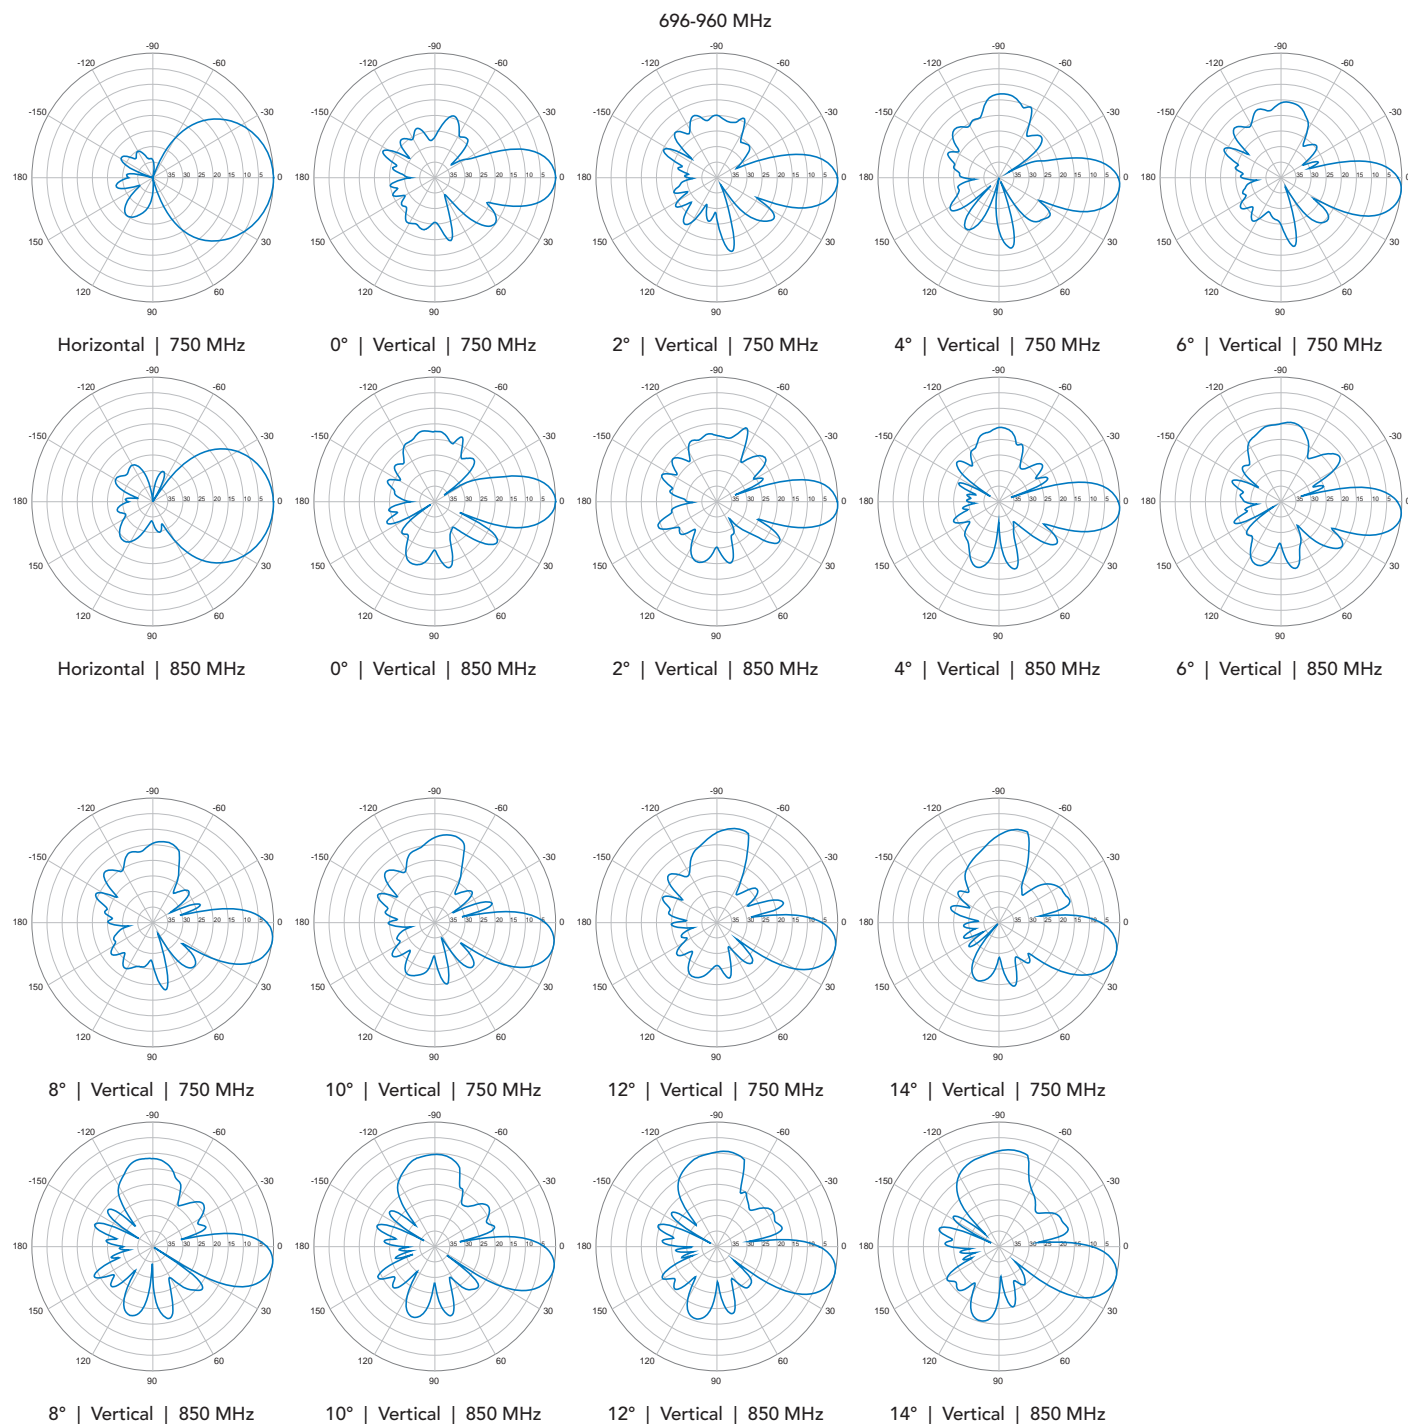

In order to operate RET control, the transparent cap covering the tilt adjustment indicator must be engaged and locked. Do not cut it from the antenna.
