

MA160PS00

DISCRETE ANTENNA

This Cellular antenna have a low profile design which enable to be installed in locations where it is not practical for a normal antenna to be located. It can be mounting on either front or rear wondscreens, or alternatively covertly installed within the vehicle, so that it is not visible. The absence of external whip avoids any problems caused by vandalism, windscreenwipers, carwashes .....

Type	Lambda/4
Frequency (MHz)	380 - 470
VSWR	< 2
Gain	0
Impedance (Ohms)	50
Maximum power (watts)	25
Termination	Low Loss RG58 (4,50 m) + FME socket fitted
Color	Black
Weight (g)	225
Size (mm)	100 x 50 x 5
